An innovative approach to healing in the workplace

Workplace Healing's Human Recovery Platform™

complements your Employee Assistance Plan (EAP) and strengthens your ability to engage and support a grieving employee in the long term.

Markets your EAP by enhancing awareness and utilization. The Human Recovery Platform prompts leaders to refer a grieving employee to the company EAP for external support (i.e., mental health/financial/legal counseling, etc.), helping to boost awareness and utilization rates.

Fills the gap between individual employee recovery and healing in the workplace. It's out of your hands whether or not your employee chooses to use their EAP. The Human Recovery Platform picks up where an EAP leaves off by providing streamlined tactics to confidently acknowledge, engage and support employees suffering from grief-related symptoms affecting job performance.

Strengthens your team. When one employee experiences a life disruption, it disrupts the entire team. The Human Recovery Platform provides tactics that help you reduce presenteeism, turnover and absenteeism, effectively strengthening team engagement, retention, productivity and morale.

Provides empathetic leadership development. The Human Recovery Platform is an easy-to-use portal that provides you with long-term strategies to demonstrate care, skillfully manage crucial conversations, and enhance workplace well-being.

Let's talk.
